

# Info Session

## Third Call for projects

Project long-term effects and durability

Isabel Moreira da Silva, Project manager

Porto, November 28th 2024

# Ownership/durability

## Ensuring Project sustainability of Outputs and deliverables

- **Ongoing Support & Maintenance**

When a project develops outputs (e.g., digital platforms, tools, or systems) that require ongoing use and upkeep, it's needed to address post-project responsibilities.

- **Financial & Institutional Support**

Establish clear accountability for financial and institutional support after project conclusion.

- **Sustainability and Long-term impact**

Ensuring proper support guarantees the sustainability and long-term impact of the project.

# Lasting effects/dissemination

Deliverables available for dissemination

- **Long-Term Availability of Outputs**

Ensure that outputs and deliverables are accessible to relevant target groups .

- **Lasting Effect**

Make sure that these resources are actively used to create a lasting impact on the territory or community.

# Transferability

## Transfer of project outputs and deliverables

- **Adaptation & further development**

Outputs and deliverables can be adapted or enhanced to meet the needs of additional target groups or be rolled out in other territories beyond the original partnership.

- **Ensuring Awareness**

Communication and capitalisation activities will ensure that relevant groups are informed about the availability and potential uses of these outputs and deliverables.
